**Tools:** Git | Netlify | VS Code | NPM | React Router | Vite | Vercel.

**Soft Skills:** Teamwork | Time management | Responsibility.

## PROJECTS

### Project 1: Quick Ship. (Group Project)

[Visit](#) | [Font-End Code](#) | [Back-End Code](#)

**Overview:** The International Delivery System Service is a Next.js-based web application designed to provide users with a seamless and efficient international parcel delivery experience. This project is done with the team. Admin User: [admin007@gmail.com](mailto:admin007@gmail.com) Pass: Admin007#

#### Key Feature:

- Product shipment tracking.
- Online payment.

**Technology:** Next.js, Tailwind, Node.js, Express.js, MongoDB and Firebase.

### Project 2: Super Shop. (Admin: [admin007@gmail.com](mailto:admin007@gmail.com) Pass: Admin007#)

[Visit](#) | [Font-End Code](#) | [Back-End Code](#)

**Overview:** In this Project, I have built a web application for online Super Shop. An online super shop offers a diverse array of products across various categories, providing convenience and choice to customers shopping from anywhere.

#### Key Feature:

- Scheduled Deliveries.
- Smart Search and Filters.

**Technology:** Next.js, Tailwind, Node.js, Express.js, MongoDB and Firebase.
